Welcome to BODUM®

Congratulations! You are now the proud owner of a BISTRO water kettle, an electric water kettle by BODUM®. Please read these instructions carefully before using the water kettle.

IMPORTANT SAFEGUARDS

– When using electrical appliances, basic safety precautions should always be followed including the following.
– Before operating this appliance for the first time, read all instructions. Failure to observe the instructions and safety notes may result in hazardous conditions.
– After unpacking the appliance, check it for damage. If in doubt, do not use it, contact your dealer.
– Keep the packaging materials (cardboard, plastic bags etc.) out of reach of children (danger of suffocation or injury).
– This appliance is designed for household use only. Do not use outdoors.
– Do not place on or near a hot gas or electric burner, or in a heated oven.
– The kettle is only to be used with the stand provided.
– The manufacturer rejects any liability for damage or injury caused by improper or unreasonable use. Do not use appliance for other then intended use.
– Do not allow children to play with the appliance.
– Close supervision is necessary when any appliance is used by or near children or not familiar persons.
– This appliance is not intended for use by young children or infirm person unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely.
– Never touch the appliance with damp or wet hands. Do not touch the mains cable or plug with wet hands.
– Do not touch any hot surfaces. Only use the handle to pick up the kettle.
– The use of any accessory attachment, not recommended by the appliance manufacturer, may result in fire, electric shock or injury to persons.
– Never fill the kettle with water when it is positioned on the base unit.
– Never fill the kettle above the «MAX» mark.
– Scalding may occur if the lid is removed during the brewing cycles.
– If the kettle is overfilled, boiling water may be ejected.
– Do never boil water without the lid on.
– Always ensure that you pour out boiling water slowly and carefully, taking care not to tilt the spout too rapidly.
– To prevent scalding, avoid coming into contact with the steam escaping from the opening in the lid when the water is being boiled or just after the kettle has switched off. Be careful when opening the lid, if the kettle is still hot and you wish to refill it with water.
– Boiling water can cause burns.
– Move the appliance with extreme care when it contains hot water.
– Do not forcefully locate the switch in the ON position, or make any authorised changes to the switch in order to make it stay in the ON position. This could lead to steam escaping from around the lid, damaging the automatic switch-off mechanism and possibly causing bodily injury.
– Never immerse the item in water, remember this is an electrical appliance.
– Only clean the appliance using a damp cloth.
– To disconnect, remove plug from wall outlet.
– Always unplug the appliance by holding the plug, not the cord.
– Do not let cord hang over edge of table or counter, or touch hot surfaces.
– Unplug the power cord from the wall outlet when the kettle is not in use and before cleaning. Allow the kettle to cool before cleaning it.
– Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment.
– Never attempt to exchange the mains cable of the appliance as special tools are required for this. To ensure continued safety of the appliance, if the cable needs to be repaired or exchanged, have this carried out exclusively by a customer service workshop authorised by the manufacturer.
– To protect against fire, electric shock and injury to persons do not immerse cord, plug, kettle container and power base in water or other liquid.
– Do not operate the kettle on an inclined plane. Do not operate the kettle unless the element is fully immersed. Do not move while the kettle is switched on.
– To prevent damage to the appliances do not use alkaline cleaning agents when cleaning, use a soft cloth and a mild detergent.

Caution: To ensure continued protection against risk of electric shock, connect to properly grounded outlets only.

SAVE THESE INSTRUCTIONS
INSTALLATION
– Place the appliance on a stable flat surface which is neither hot nor near a heat source. The surface must be dry. Keep the appliance and its mains cable out of reach of children.
– During use, do not place the base unit on a metal tray or a metal surface.
– Ensure that the voltage indicated on the rating plate of the appliance agrees with the mains voltage in your area. Connect the appliance only to a properly earthed power point. (Use of a residual current device (RCD) reduces the risk of electric shock, seek the advice of an electrician.) While the appliance is in use, the mains plug must be accessible in case of an emergency. To ensure continued protection against risk of electric shock, connect to properly grounded outlets only.
– If the power point is unsuitable for accommodating the plug of your appliance, have the power point changed by a licensed electrician.

PARTS OF THE KETTLE
1 Hinged lid
2 Button to open the lid
3 Scale filter
4 Water level gauge
5 Reset-Button
6 Indicator light
7 Base unit
8 Max water level indicator
9 Min water level indicator

SPECIAL INSTRUCTIONS
POWER-SUPPLY CORD
– A short power-supply cord is to be provided to reduce risks resulting from becoming entangled in or tripping over a longer cord.
– Extension cords are available and may be used if care is exercised in their use.
– If an extension cord is used, the marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance, if the appliance is of the grounded type, the extension cord should be grounding -type 3-wire cord. The longer cord should be arranged so that it will not drape over the counter top or table top where it can be pulled on by children or tripped over.
SAFETY CUT-OFF
The kettle is protected against damage resulting from use with an insufficient volume of water. A safety cut-off will automatically disconnect the power supply if the heating element overheats.

Should the kettle ever boil dry during operation, you must leave it to cool for 10 minutes before re-filling it with cold water. The safety cut-off will reset automatically once it has cooled.

BEFORE USING THE KETTLE
Clean the kettle before using it for the first time by filling it completely (to the MAX mark) with water, boiling the water, and then discarding the water.

HOW TO USE THE WATER KETTLE

FILLING THE WATER KETTLE
– Remove the appliance body from the base unit (7).
– Open the lid (1), fill with water and close the lid again.

Do not fill the kettle with less than 0.15l/4oz and not more than 0.5l/17oz (above the MAX mark), to prevent the kettle from boiling dry or boiling water escaping from the spout.

CONNECTION TO POWER SUPPLY
– After filling the kettle, position it on the base unit (7). Ensure that the kettle body is seated correctly on the contact unit on the base unit (7).

OPERATION
Insert the mains plug into an electrical outlet and press the ON button (5). The indicator light (6) will come on.

As soon as the water reaches boiling point, the kettle will switch off automatically and the indicator light will extinguish. To repeat the boiling process, press the ON button (5).

Note: if the kettle has switched itself off upon reaching boiling point, there may be a delay of up to 15 minutes before it can be switched back on again.
– Only remove the kettle from the station once it has automatically switched off after boiling. If this is not the case top the kettle up with water to the MIN mark and leave it to boil, waiting until the kettle switches itself off.

Note: The kettle cannot be switched off manually. The ON switch only serves to turn it back on again.

Caution: if the kettle is empty, take care not to place it on its base with the switch in the ON position.
POURING OUT WATER
– To remove the kettle from the base unit (7), hold it by its handle. Ensure that the kettle body remains level while lifting it from the base unit (7).
– Pour the water from the spout with the lid (1) closed

Note: Please take care when pouring out water as boiling water can cause scalds.

SWITCHING THE KETTLE ON AGAIN
– You may switch the kettle on again as soon as the built-in thermal safety cut-off switch has had sufficient time to cool.

MAINTENANCE AND CARE

SCALE FILTER
Scale, or calcium, is a natural substance that forms when hard water is boiled. The filter serves to retain the calcium in the water kettle.

CLEANING AND REMOVAL OF THE FILTER
It is important to clean the filter regularly. The filter clips into the body and can be removed by pulling it upwards from the body. It can be cleaned by gentle brushing with a soft brush under running water.

KETTLE CLEAN AND DESCALE
Remove scale using either a proprietary descaling product suitable for plastic kettles (following the instructions carefully), or citric acid.

We recommend using citric acid as follows:
Boil 0.5 litre of water, then unplug the kettle and stand it in an empty sink or bowl. Add 25gm of citric acid crystals gradually, then leave the kettle to stand.
As soon as the effervescence subsides, empty the kettle and rinse it thoroughly with cold water. Wipe the outside of the kettle thoroughly with a damp cloth to remove all traces of citric acid which may damage the finish.
Do not use a more concentrated solution. Ensure that the electrical connections are completely dry before using the kettle. Citric acid crystals are available at most chemists.

– Failure to de-scale may invalidate the guarantee.
– Never use chemicals, steel wool or abrasive agents to clean the exterior of the kettle.
– Only clean the appliance using a damp cloth.
– Never immerse the item in water: remember this is an electrical applicant.
– Any other servicing should be performed by an authorized service representative.
STORAGE
Note: Ensure that the mains power supply is switched off when you are not using the kettle.

Correct disposal for this product

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

SERVICE & GUARANTEE CONDITIONS

All BODUM® products are made of high-quality, durable materials. However, should parts require replacement, please contact one of the following: your BODUM® dealer - the BODUM® SHOP - the BODUM® representative in your country, or our homepage at www.bodum.com

Guarantee. BODUM® guarantees the «BISTRO» water kettle for 2 years from date of purchase against material defects or malfunctions which can be traced back to defects in manufacturing or design. Repair is free of charge provided all guarantee requirements are fulfilled. No refunds can be made.

Guarantee requirements. The guarantee certificate must be completely filled out by the seller at the time of purchase. Only agents authorized by BODUM® may perform guarantee services.

BODUM® makes no guarantee for damage which can be attributed to use for unintended purposes, incorrect handling, normal wear and tear, defective or incorrect maintenance or service work, incorrect operation or manipulation by unauthorized persons.
